- Angle welding magnetic medium for the handling of pieces together during the welding. Can be positionned on the inside as well as on the outside of the angle to work confortably even with a difficult access
- This tool is composed of two independent rectangular angles so that the magnetic force does not need to be reduced when the two angles are attached to the pieces
- Use the mounting hole to connect two magnets and thus use them as a 30 to 270° angle magnetic block
- Use the hexagonal hole on the magnet to get a lever effect

- Angle: between 30 and 270°
- Height: 156mm
- Length: 156mm

- Thickness: 20mm
- Maximum pulling strength: 15kg
