- Must be used for tack welding only and remove before completing welding. Avoid exposing the magnets to heat sources of over 80°C for too long.
- For professional works that require a strong holding strength, this magnet enables the holding of metal flat or round workpieces with a maximum pull force of 120kg
- It is composed of two magnetic parts to hold several workpieces together when welding, grinding, or any other work that requires free hands to work fast and easily

- Two On/Off switches (one for each side)
- Deactivate the magnets when setting up, activate them when you're ready to work. Easy and safe set-up!
- Flat and V-shaped surfaces machined with precision are ideal for round and square pipes, angular pipes and flat stocks

- Maximum pull force: 120kgs
- Dimensions: 197 x 197 x 48mm
