Max. Pull Force : 272kg

- Magswitch's Extandalift is a tool that is able to pick up and move metallic objects on the ground (manhole cover, lids, valve etc) without bending down or touching with the hands.
- Turn the handle to activate or deactivate the 272kg magnetic strength
- This electricity-less tool is advised for the security it brings: no need for the operator to touch the heavy, hot, sharp or dirty items. They don't hurt their back by bending down
- Very useful for cities and public services
